OUR SOLUTIONS / SERVICES

Data Centre Power and Cooling Solutions

Whether On-premise, Cloud or Hybrid solutions, data centers are the engine room of the modern economy. With our extensive design capabilities, we can design, manage and support any level of data center environment and provide unmatched expertise through our wide breadth of partnerships.
We have also developed capacity in power solutions from inverters to solar that provide power to data centers and other mission-critical ICT infrastructures. We combine this with the latest technology in cooling systems. Some of our competencies include:

- Data Centre Evaluation, Certification and Design to meet different standards and tier levels including (SAS70, SSAE16, SOC2 and 3) auditing levels for data centers.

- Data Centre Design, Fabrication and Construction (Schneider electric, Huawei)

- Data Centre Compute, Network and Storage Design (Cisco, HP, Microsoft, Dell, EMC, Nimble and VMWare Technologies)

- Solar and Power solutions with remote monitoring capabilities

- Cooling solutions (cold/hot aisles, liquid cooling for data centers)

- Software defined Networking (SDN) for Data Centers (Avaya, HP, Dell and Cisco)

CBPillars Technologies Ltd

OUR SOLUTIONS / SERVICES

Business Support Outsourcing

CBPillars Tech Ltd will provide unmatched support services in the following outsourced areas:

End-user support

Troubleshooting of network application problems, PCs, Network Infrastructure and resolution of other end user related issues are areas your organization may wish to outsource. We combine this service with consulting where we advise you on the required technology and equipment upgrades as your current infrastructure become obsolete

Logistics and Supply Chain Management

We take the headache out of your logistic challenges and always guarantee on time delivery irrespective of the model (On air, land or Sea). Furthermore, with our efficient supply chain management process, we guarantee goods and services are delivered in good time with efficient inventory process at a justifiable cost

Humanitarian Aid Supplies

As a company with extensive experience in IT, logistics, import and export, we provide high quality relief and support materials in disaster regions that enable first responders address issues as they arise and ongoing relief materials for eventual stability and support. Some of the services offered include:

OUR SOLUTIONS / SERVICES

Humanitarian Aid Supplies

Communication gadgets and equipment during disasters e.g. Radios, base stations, emergency command and control centres, all-terrain vehicles for accessing remote locations, drones for search and rescue amongst others

Relief materials and supplies e.g. Blankets, daily needs and other associated supplies we help victims of disasters get back on their feet quickly.

With our extensive local knowledge and experience, we guarantee good quality products that match local taste and culture while improving standard of living in hard hit areas.

Green Energy /Green IT

As organizations seek to reduce their carbon footprint and save on opex cost, we enable and accelerate the process by providing turnkey efficient and cost effective power and IT infrastructure solutions that eliminate waste and reduce consumerism. We believe the earth is our oasis and development can co-exist with environmental balance peacefully.

## Enterprise infrastructure support

You can outsource your LAN, WAN and Network management infrastructure and Tristar Tech Edge will do the following:

- Troubleshoot the network cable
- Troubleshoot network point faults
- Troubleshoot network equipment faults
- Appraise and test all network infrastructure, noting performance trends.
- Carry out trend analysis-with the resulting recommendations for action.

OUR SOLUTIONS / SERVICES

Network Infrastructure

Our Network Infrastructure services are built around these solutions:

Network System

- Routers
- LAN Switches
- Network Management
- IOS Software

Network System

- Firewall
- Attack and intrusion prevention
- Spam and virus protection
- Virtual Private network for remote users
- Network admission control
- Physical Security (Video surveillance Convergence chassis.

Unified Communication

- IP Telephony
- Smart business communication
- Customer contact
- Voice Network Management
